By working together with community and regional partners we can implement the programs and initiatives that truly make a difference in our community. This Membership Level supports all of our initiatives. Utilizing our National Main Street Center and Oregon Main Street networks, we have access to proven programs that have worked for other communities across the country. Tailoring these programs to Pendleton can create a sustainable economy by intertwining our Downtown with our unique Culture to create an amazing representation of our amazing community.	\$1000
